Rational Functional Tester for Java

QUESTION: 44

Which statement is true about the "Time Delayed" method when you are creating verification points in your scripts?

A. It introduces a fixed delay after a previous action before the verification point is tested
B. It allows a verification point to keep trying until the time specified has elapsed
C. It gives the tester time to reveal pop-up objects (such as menus) during the creation of a verification point
D. It gives the tester the opportunity to specify a delay after a verification point fails

Answer: C

QUESTION: 45

Given the following manual verification point vpManual ("manual1", "The rain in Spain", "The Rain in Spain").performTest(); What are the results?

A. The two strings are the same, and a pass would be generated in the log
B. The two strings are different, and a fail would be generated in the log
C. The syntax is incorrect, so this would not compile
D. This will compile but the parameters are mixed up, and a fail would be recorded in the log. The correct syntax is: vpManual ("The rain in Spain", "The Rain in Spain", "manual1").performTest();

Answer: B

QUESTION: 46

Which branches under Preferences contain specific settings to enable the ClearCase integration?

A. Workbench and Test
B. Functional Test and Run/Debug
C. Workbench and Team
D. Plug-in Development and Functional Test

Answer: C

QUESTION: 47
When you set break points, why does the script not stop at the break points and switch over to the debug perspective?

A. This is a known eclipse bug in version 6.1 and has been corrected in the latest release or last interim fix
B. The break point has already been recognized by the JVM and the break point needs to be toggled
C. Either the icon or debug functional tester script was not invoked or the shift + F11 menu option was not invoked
D. The debug perspective is not listed as an available perspective when trying to debug a script

Answer: C

QUESTION: 48
When you enable web browsers, what is the best way to select the Linux or UNIX web browser?

A. You use the Search button, choose Search All, select the executable, and provide all the   needed parameters.
B. Modify the registry to enable Linux or Unix web browser support
C. Modify the Internet Explorer settings to refer to a Linux or Unix web browser
D. You use the Search button, choose Search In, browse to the executable, and provide all the needed parameters

Answer: D

QUESTION: 49
In which situation is it best to use the Browser Enablement Diagnostic tool?

A. when the web browser does not launch when invoked through Functional Tester

B. when testers are trying to determine it their web browsers are compatible with Functional Tester

C. when Functional Tester is in the recording process and no HTML objects are being recognized

D. when Functional Tester is not able to launch the viewlet comparator on the HTML log

Answer: C

QUESTION: 50

You cannot access help file from Rational Functional Tester. You receive an error or the page loads slowly. How can this be fixed?

A. talk to the LAN Administrator to see if there is a problem with the corporate network or if the ISP is having performance issues

B. in Network properties, change the IP configuration to static IP and provide a valid IP address, which can be obtained from the LAN Administrator

C. in the Network Advanced settings for proxies, remove "127.0.0.1; localhost" from the   Exceptions if these addresses are listed

D. if your host was configured to use DHCP for IP assignment, make sure that the "Automatically detect settings" checkbox is cleared

Answer: D

QUESTION: 51

Where do you set the option for switching to Test Debug perspective when debugging?

A. Preferences > Functional Test > Workbench > Advanced
B. Preferences > Java > Debug
C. Preferences > Run/Debug > Console
D. Preferences > Test

Answer: A

QUESTION: 52

How do you add line numbers within the script editors view?

A. use a third party plug-in because this option is not available within the tools interface
B. download the latest version of the plug-in
C. select the option under the main menu > Window > Preferences > Debug
D. select the option under the main menu > Window > Preferences > Editor

Answer: D

QUESTION: 53
How many default Java environments can you have within one configuration of Rational Functional Tester?

A. one for each instance of the application under test
B. as many default Java environments as are needed to do testing
C. You can change the java environments dynamically when testing different applications.
D. only one

Answer: D

QUESTION: 54
What is the best practice when changing object maps that are already assigned to Functional Test projects?

A. highlight the project in the Functional Test projects, right-click, select Properties > Functional Test project and browse to the new object map
B. record a new script, select the new Functional Test project, click next and browse to the new   test object map
C. modify the XML file, configurations.rftcfg, locate the object map section, enter the proper   object and save the XML file
D. right-click the test object map in the script explorer, choose the Open option and make necessary changes

Answer: A
