- D. The hostname and IP address of the workstation being used

**Answer: A**

**QUESTION: 131**

Which two components are used to create custom events? (Choose two.)

- A. AccessStudio
- B. AccessAdmin
- C. AccessAssistant
- D. IMS Configurationutility
- E. Access Manager Console

**Answer:** A, B

**QUESTION:** 132

A customer has updated an enterprise application and IBM Security Access Manager Enterprise Single Sign-On V8.2 does not inject credentials anymore. What can be done?

- A. Install the latest fix pack on all Access Agents and check if the application works.
- B. Use AccessStudio to test the new application and understand what has changed in the application's signature. Update the Access Profile to match the new updated application. Replace the Access Profile on the IMS Server.
- C. From AccessStudio, launch the updated application and use the AccessAgent.log file to understand what has changed in the application's signature. Update the Access Profile to match the new updated application. Replace the AccessProfile on the IMS Server.
- D. Update the system policies to enable Access Profile Test mode. Troubleshoot the updated application then update the Access Profile on the IMS Server. Wait for the next AccessAgent synchronization for the profile to be sent from the IMS Server to the AccessAgent. Eventually disable the Access Profile Test mode from the system policies.

**Answer:** B

**QUESTION:** 133

Which tool can be used to view audit logs from the IMS Server?

- A. AccessAgent
- B. Web Workplace
- C. AccessAssistant
- D. Tivoli Common Reporting

**Answer:** D

**QUESTION:** 134

What limits the number of active concurrent user sessions in a private desktop?

- A. Active Directory
- B. Availability of RAM
- C. Availability of ROM
- D. Availability of hard disk

**Answer:** B

**QUESTION:** 135

Which software components are pre-installed on an IMS Virtual Appliance?

- A. SUSE Linux Enterprise Server, IBM WebSphere Application Server, IBM HTTP Server, Tivoli Common Reporting, IMS Server V8.2
- B. Red Hat Enterprise Linux Server, IBM WebSphere Application Server, IBM HTTP Server, Tivoli Common Reporting, IMS Server V8.2
- C. SUSE Linux Enterprise Server, IBM WebSphere Application Server, IBM HTTP Server, Tivoli Common Reporting, IMS Server V8.2 basic support for fingerprint, REID, and Smart Card authentication
- D. Red Hat Enterprise Linux Server, IBM WebSphere Application Server, IBM HTTP Server, Tivoli Common Reporting, IMS Server V8.2 basic support for fingerprint, REID, and Smart Card authentication

**Answer:** A

**QUESTION:** 136

Where are error details found regarding issues with the MS Server?

- A. WebSphere SystemErr.Iog
- B. AccessAdmin>Audit Logs
- C. WebSphere System Qut.Iog
