Question: 1

What data can be exported from SAP Analytics Cloud to SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. Statistical key figures
- B. Activity prices
- C. Master data attributes
- D. Hierarchies

Answer: A B

Question: 2

Which of the following actions would allow you to use data point comments? Note: There are 2 correct answers to this question.

- A. Insert a calculated column to a table.
- B. Add a comment widget to the story.
- C. Activate comments by model.
- D. Activate comments by dimension.

Answer: A B

Question: 3

Which data locking status can you use to prevent manual data entry?

- A. Released
- B. Closed
- C. Submitted
- D. Restricted

Answer: D

Question: 4

You are planning with two hierarchies that have different granularity. Your model contains no data. The story has two pages: a parent planning page and a member planning page (see screenshot).

	Version	Plan
Country		
▼ Americas		--
North America		--
South America		--

	Version	Plan
Country		
▼ Americas		--
▼ North America		--
US		--
Canada		--
▼ South America		--
Brazil		--
Peru		--
Chile		--

In the Member Planning page you enter the following data: Brazil 100, Chile 100, Peru 100

In the Parent Planning page you enter the following data: North America 10000, South America 30000

When you go back to the Member Planning page, what will you see? Note: There are 2 correct answers to this question.

- A. North America 10000, US 5000, Canada 5000
- B. South America 30300, Brazil 10100, Chile 10100, Peru 10100
- C. South America 30300, Brazil 100, Chile 100, Peru 100
- D. North America 10000, US 0, Canada 0

Answer: A B

Question: 5

What node types can be imported from S/4HANA? Note: There are 3 correct answers to this question.

- A. T
- B. L
- C. N
- D. H
- E. R

Answer: B C E

Question: 6

You want to create a copy data action that allows you select the source values and target values for the following dimensions at run time: Version, Account, Time. What do you specify for each of these dimensions? Choose the correct answer.

- A. Source version parameter in the filter. Source and target parameters for account and time in the copy rules
- B. Source and target parameters for version in the filter. Source and target parameters for version and time in the copy rules
- C. No Filter. Source and target parameters for version, account, and time in the copy rules
- D. Source and target parameters for version in the filter. Source and target parameters for version and time in the copy rules.

Answer: A

Question: 7

What can you do in an analytic application?

- A. Enter form-based comments.
- B. Trigger input tasks.
- C. Read data from write-back models.

Answer: C

Question: 8

Which DataStore object (advanced) properties must be selected to export data to SAP Business Warehouse? Note: There are 2 correct answers to this question.

- A. Write interface enabled
- B. Write change log
- C. Direct update datastore object
- D. Standard datastore object

Answer: A D

Question: 9

Which SAP Analytics Cloud Machine Learning function provides performance indicators that can be used to evaluate the accuracy of a statistical model?

- A. Smart Predict

- B. Smart Insights
- C. Smart Grouping
- D. Smart Discovery

Answer: A

Question: 10

You imported a transaction data file into an empty model with the results as shown in Figure A. Later, a member of the finance team wants you to import a new data file. In the new data file, you find the following differences: The value of the Labor account has increased to 1600. There is a new record for the Services account, with a value of 250. The record for the Travel account has been deleted. To achieve the result shown in Figure B, which option must you use to update the data?

Fig. A

Data Foundation				Version: Actual
Total Number of Results: 6				
Account	Date	Currency	P000_CostCenter	Values
Benefits	202001	USD	HR	250
Labor	202001	USD	HR	1500
Travel	202001	USD	HR	500

Fig. B

Total Number of Results: 7				
Account	Date	Currency	P000_CostCenter	Values
Benefits	202001	USD	HR	250
Labor	202001	USD	HR	1500
Services	202001	USD	HR	250
Travel	202001	USD	HR	500

- A. Update
- B. Clean and replace subset of data with Scope = Version and Account
- C. Append: Reject duplicated rows in model
- D. Clean and replace selected version data

Answer: A
