Question: 1

The command file DBEXPORT.R3S controls the database export of a

- A. Heterogeneous system copy.
- B. For both systems
- C. Homogeneous system copy

Answer: B

Question: 2

A customer plans to invest in a new and more powerful hardware for his ABAP-based SAP production system (no JAVA web As installed). As the operating system and database version are not up-to-date, he also wants to change to the latest software version in a single step while doing the system move.

Current system configuration: Oracle 10.2, AIX 6.1

Planned system configuration: Oracle 11.2, AIX 7.1

Is the planned system move a ..

Which statement is false?

- A. An OS migration
- B. A DB migration
- C. Homogeneous system copy
- D. Heterogeneous system copy

Answer: D

Question: 3

To prevent unintended overlaps between field names in tables and R3LOAD key words, as well as other inconsistencies. What do you perform?

- A. Before the data export/import, R3LOAD performs a syntax check on the *STR files.
- B. After the data export/import, R3LOAD performs a syntax check on the *STR files

Answer: A

Question: 4

Every database vendor provides a JDBC interface for easy database access. Interface? which JDBC interface is used for SAP?

- A. JDBC interface provide by the database vendor
- B. SAP using it own JDBC interface

Answer: B

Question: 5

The "SAP OS/DM Migration Check Analysis session" Will be performed on

- A. The production migration source system
- B. The migrated production system after the final migration

Answer: A

Question: 6

Which statement is wrong regarding JLOAD?

- A. The data storage format of the export dump files is database and operating system dependent
- B. JLOAD loads data through the SAP JDBC interface, which connects to the database
- C. JLOAD unloads data through the SAP JDBC interface, which connects to the database.
- D. JLOAD uses SAP open SQL to access database data

Answer: A

Question: 7

Which will unloads/loads ABAP Table data from/into the database?

- A. R3LDCTL
- B. R3LOAD

Answer: B

Question: 8

The R3TA WHERE file was spitted and the result were

- A. Put directly into */exp/DATA*
- B. Were copied into */exp/DATA*

Answer: B

Question: 9

Which Statement are correct?

- A. Optional MIGMON can be used to reduce the unload and load time significantly
- B. R3SETUP generate a DBSIZE.TPL. R3SZCHK create a DBSIZE.XML for SAPINST.
- C. Once the size of each table and index has been calculated, R3SETUP/R3SZCHK computes the required database size.
- D. R3SETUP/SAPINST/MIGMON generates R3LOAD command files for every *STR file

Answer: A,B,C,D

Question: 10

The JMIGMON "Stand Alone Configuration" is useful in environments,

- A. Where files systems can be shared between source and target system
- B. Where source and target system do not have a network connection, or the existing connection is too slow for a file transfer

Answer: A

Question: 11

The "SAP OS/DB Migration check verification session" will be performed on

- A. The migrated production system after the final migration
- B. The production migration source system

Answer: A

Question: 12

The "SAP OS/DB Migration Check" is mandatory for each

- A. Quality assurance system
- B. Production system
- C. Development system
- D. Test system

Answer: B

Question: 13

Every R3LOAD process needs a command file to start a data export, which programs generate the command files?

Which statement is false?

- A. R3SETUP
- B. SAPINST
- C. R3LDCTL
- D. MIGMON

Answer: C

Question: 14

The "split" parameter defines the size limit for

- A. JPKGCTL packages
- B. JLOAD packages

Answer: B

Question: 15

Which table contains short description in various languages?

- A. DARTT
- B. TS<DBS>
- C. DDART
- D. DFACT

Answer: A

Question: 16

Every R3LOAD process needs a command file to start a data export or import.
How do the programs know how many command files to create if no table splitting is involved?

- A. From *.EXT file
- B. From *.STR file

Answer: B

Question: 17

The "SAP OS/DB Migration check Analysis session" is focused on the special aspects involved in the platform or database change. Which statement is true?

- A. It is performed on the production SAP system with regard to target migration system environment.
- B. It is performed on the Development SAP System with regards to the target migration system environment.

Answer: A
