Question: 1

Which of the following must be performed by the Site Administrator?

A. Create new analyses in an external site.
B. Import custom reports in Web Reports
C. Set and modify global system options.
D. Take action on patch Baselines

Answer: C

Question: 2

A BigFix Administrator is designing an environment to support a highly distributed environment with over 1000 remote sites with relays. When planning Top Level Relays which of the following should be considered?

A. A Top Level Relay has no limit as to the number of relays they can manage.
B. A Top Level Relay can manage up to 40 relays.
C. A Top Level Relay can manage up to 80 relays.
D. A Top Level Relay can manage up to 120 relays.

Answer: D

Question: 3

A BigFix Non-Master Operator takes an action on several patch Fixlets and targets computers by selecting an automatic computer group. Instead of including those Fixlets in a Baseline, the operator decides to select all of the Fixlets in the Console and create a Multiple Action Group. This causes an error to be displayed in the Console.
Which of the following statements describes the reason for the error?

A. A Multiple Action Group can only be created from the WebUI.
B. A Multiple Action Group can only be created by a Master operator.
C. One or more of the Fixlets that are selected do not contain a default action.
D. The operator does not have Write permission to the computer group that they are targeting.

Answer: C

Question: 4

What is the default port used for BigFix Web Reports to connect?

A. Port 443
B. Port 52311
C. Port 8083
D. Port 80

Answer: C

Question: 5

When creating roles in Web Reports, which of the following check boxes are available to define permissions? (Choose three.)

A. Allow creating and saving of scheduled activities.
B. Allow editing of public filters, reports, and labels.
C. Allow creating and saving of custom content.
D. Allow editing of email server.
E. Restrict view by console user.
F. Restrict view by WebUI user.

Answer: B, C, E
